

HuRis Cloud Services **ILLNESS MANAGER**

an **SAP SuccessFactors**  add-on

With the **Illness Manager** your case manager, line manager, HR-professional, or other related role has a complete overview of all sick employees, the re-integration history and the activities. They will be automatically notified when an activity should be performed.

All required activities can be updated, optional activities can be added and related documents can be stored within the **Illness Manager**. This way, a complete timeline and digital re-integration file of the employee is automatically created and HR and management can monitor if the right activities have been performed.

FEATURES AND BENEFITS

- ✓ Report sick, partial sick and recovered efficiently
- ✓ Full support for legislation (e.g. Dutch “Wet Verbetering Poortwachter”) and company re-integration policies
- ✓ Adding you own optional activities
- ✓ Supporting multiple protocols with activities
- ✓ Get notified when re-integration actions are required
- ✓ Create a complete digital file with re-integration reports and activities
- ✓ Facilitate managers, actively working on the re-integration of employees
- ✓ Based on real time information from SuccessFactors
- ✓ Using SuccessFactors authorizations (Role Based Permissions)

“The costs of absenteeism are on average 4% of total labour costs, which offers enormous potential for savings. The most important success factor is management attention and support for the sick employees to realize a fast and effective reintegration.”
