

HuRis Cloud Services **IMPORT MANAGER**

an **SAP SuccessFactors**  add-on

With the **Import Manager** you can upload your collective salary changes, replacements, time-balance updates, new hires, anonymized test populations, etc. easily by using pre-defined (Excel) templates.

For each process a specific template will be generated and can be used by the right (decentral) user by just adding the right data in the Excel file. The files can be uploaded by (decentral) users based on their SuccessFactors authorizations, but without having to have any admin access. In this way the **Import Manager** will save your organization a lot of time!

With the Import Manager, HR representatives can import data with a user-friendly tool, saving a lot of time and preventing errors.

FEATURES AND BENEFITS

- ✓ Using SuccessFactors authorizations (Role Based Permissions)
- ✓ Mass changes can be done by the right (decentral) user
- ✓ Guidance for users with easy upload templates
- ✓ Using Excel for data import file
- ✓ Supports all SuccessFactors modules
- ✓ Supports propagation rules
- ✓ Real-time data integration with SuccessFactors
